

Product Overview :-

Cable Looping storage clamp, as the name itself suggests, is a pole / wall mounting clamp which is used for storing excess cable loops in aerial cabling. It is designed in such a way that it is easy for field operator to easily remove the carriage bolt through the key hole and then opening the rubber cushion. The rubber cushion is made of EPDM.

Main Technical Indicators :-

	Cable Looping Storage Clamp
Product Code	J-Clamp
Max Load	250 Kgs
Galvanization Coating Thickness	Upto 65 microns

Product Configuration :-

Particulars	UOM	Quantity
Cable Loop Storage Clamp	Pcs	1
Jubilee Hose Clamp	Pcs	2
EPDM Rubber (50mm ID)	Pcs	1
Self Lockable Ball lock Cable Tie (SS)	Pcs	3
M10 Carriage Bolt (Zinc Coated)	Pcs	1
M10 Nut & Washer (Zinc Coated)	Pcs	1

We have a dedicated in house R & D to develop these clamps as per your technical requirement.
