

DC ISO 9001:2015 Group		STAINLESS STEEL	Data Sheet No: DC/CJKC/005
		CHANNELS	Revision: 00
			Tech Dwg No : DC/SSC/001

Product Overview :-

Stainless steel channel is an accessory to the heat shrink cable jointing kit. It is used for zipping the heat shrink wrap around sleeve which is wrapped around the cable during the cable jointing. S.S. Channels are also used for cable repairs & corrosion protection of cable joint. These channels have tailored made top gaps as per the customer requirements. Also the standard sizes are available with or without the RTSF depending upon the customer requirement.
