

DC ISO 9001:2015 Group		WIRE MESH		Data Sheet No: DC/CJKC/001
				Revision: 00
				Tech Dwg No : DC/WM/001

Product Overview :-

Wire Mesh is usually made of mild steel or copper. It is one of the components in cable jointing kits used in power distribution and transmission from one end to the other. The standard width for the said purpose of usage is 50mm. It is used to wrap around the mechanical connectors used to connect the cable. The main purpose of mesh is to screen of stray currents in LV, MV, HV during Cable jointing.

However, such wire meshes are also seen used in different infrastructure related activities.

Main Technical Indicators :-

	Wire Mesh	
	Mild Steel	Copper
Product Code	MSWM	CWM
Width (Std for Jointing Industry)	50mm	50mm
Length	As per Customer Requirement	As per Customer Requirement
Plating	Zinc or as per customer requirement-	Tin or As per Customer Requirement

We have a dedicated in house R & D to develop the wire mesh as per your technical requirement.
